Reporting to the Programme Manager, as the business implementation lead/senior project manager, responsible for the global delivery of the successful outcome of the work stream for Phase 1 (financials focus A2R – SAP FICO (New G/L) and budgeting, SD, MM, BPC – HANA platform).

Key responsibilities include:

- Business readiness at all levels of the business and global finance shared services facilitating the implementation of SAP, engendering buy in in a disruptive change process, demonstrating at every turn how to leverage the system to their benefit overcoming objection and resolving difficulties in both procedural and system process and being on their side during the necessary adoption of this single system configuration needed for the good of the entire business.
- Prepare and execute project, stage, cutover and if necessary, exception plans in conjunction and coordination with other project managers (5 in total) and agree them with the project board.
- Hypercare issue management and support, 2nd level triage, issue resolution and coordination and commissioning of third party support where necessary and initiating post implementation change requests up for CAB review.
- User provisioning and segregation of duties requiring detailed study of business processes (and SOPs) and roles to ensure business continuity and minimisation of frustration and so facilitating adoption.
- The provision of single point of contact to the business for tactical response to SAP queries, provision of classroom SAP training and guidance including collateral such as quick reference guides communicated via various channels including Sharepoint.
- Target Operating Model design and implementation planning
- Management and coordination training, publishing of collateral (2 staff)
- Communications and the Finance Transformation Programme web site (1 staff)
- Planning and cross workstream integration
- Management of internal customer relationships across GFSS and business sectors.
- Responsible for all external programme communication
- Responsible for all training needs to be delivered by the programme and the business
- Establishment globally of Change Agents to assist in the adoption and embedding of change across the organisation
- Reporting of status, risks and issues and suggesting mitigations to the Programme Manager and thereafter progressing on approval.
- Ensuring all activities are carried out in accordance with the Group Project Delivery Framework (GPDF).
- 5 staff in total for the work stream (2 trainers, 1 comms, 2 BA's)
- Described by users as a "systems wizard"

June 2014 to March 2015 (Contract)

Unilever

Global Finance Connect Project – Business Delivery

To facilitate and enable successful adoption of SAP FICO (New G/L) and BI/BPC capabilities and dash boards from multiple data sources. To project manage, organise and implement the business change element of the holistic review of the reporting function for the supply chain businesses of Unilever. This amounted to significant automation of the consolidation of information processes culminating in Excel based easy to understand pivoted reports including static and dynamic reporting, dash boarding, visualizations and data diagnostics.

The project was a multi-platform solution (SAP, Teradata, SSRS) with a focus on the business readiness over multiple operational and reporting functions and multiple businesses (14) and countries (10) (Cost control. CAPEX, fixed assets, supply chain, working capital, sales and distribution materials ledger and product cost control, security).

Functions: Finance, Supply Chain Finance, Manufacturing (both discrete and process), Materials Management. Cost control. CAPEX, fixed assets, working capital, sales and distribution, materials ledger and product cost control, security

Business Readiness work packages:

- Month end close reduction – automation, pre-cut, workflow,
- Unidirectional master data (MDM) - consistency, mappings (historics), timeliness, definitions and maintenance.
- Gap analysis – appraise, facilitate, educate and understand the business functional processes and map these to the solution, identify and progress shortfalls, keep

Professional Experience Continued...

stakeholders engaged.

- Data migration - scope, infrastructure, technical aspects, 3rd party delivery, review and agreement, ensure timely and coordinated delivery
- UAT - UAT user provisioning and education, management of process, infrastructure,
- HPQC, governance, integration and progression of UAT activity, write sophisticated SQL
- HPQC extractors enabling better monitoring and automated statistical analysis of UAT
